

UPGRADE & RETROFIT OPTIMISATION TECHNOLOGY & PERFORMANCES SERVICE & MAINTENANCE

SOLUTIONS

- Almost zero emissions and dust slips
- Reliable and performing processes
- Smart maintenance & boost efficiency
- Responsible use of resources
- Healthy work conditions on site

SERVICES

- Full assessment & upgrade of existing systems
- Engineering reports with 3D & CFD modelling
- In house filter bags manufacturing (HPF division)
- Remote monitoring system up to 24/7 basis
- Multiple service bundles (on-demand to O&M)
- Worldwide supervisors & maintenance team

CONTACTS

- 📞 T. +39 035 6968501

ABOUT US

OTP Optimise Performances, a specialized division of CTP Team, engineers solutions to boost the efficiency and performance of Air Pollution Control and Waste Heat Recovery systems

FABRIC FILTERS NOT PERFORMING?

CLEANING SYSTEM OPTIMISATION

SWAP cleaning system (Sonic Wave Acceleration Pulse) is a reliable technology to improve the lifetime of the fabric filter key components and reduce the consumptions:

- Ready for any brand fabric filters
- Filtering area each row / up to 140 m²
- Low pressure compressed air / 2-3 bar
- Very short time opening valve / 20-40 ms
- Drastic energy saving / 50-70%

SERVICE BUNDLES

Type of service	Basic	Advanced	Premium
Standard remote technical support	●	●	●
On demand field service	●	●	●
Shutdown supervision	○	●	●
Planned maintenance	○	○	●
Spare parts availability	○	○	○

Legend: included ● optional ○
