Water Treatment

Activated Carbon is widely used in the Treatment of Municipal, Industrial Waste Water, Sewage Water & Process Liquids which contain a wide range of Organic and Inorganic Pollutants. Activated Carbon absorbs these Pollutants from the waste in a liquid Phase, Acting as the optimum Purification Solution.

Our Products are Coconut Shell based

High Porous & High Activated Carbon Manufactured by Steam Process

of activation from chosen Coconut Shell Charcoal. Our well equipped QC department has various latest testing equipments as per ASTM norms and we strictly follow ASTM procedures for all testing.
