

FILTER SYSTEM PARTNER

THE WHOLE WORLD
OF FILTERS

FTB-YOUR PARTNER IN FILTER SYSTEMS

Filter technology covers a wide range of applications which require a great variety of systems and solutions. Efficient filtration, adsorption and separation are indispensable for many processes in trade and industry, laboratories and building services engineering. There are only a few suppliers who provide an extensive range of replacement filters, allowing their customers to purchase all the filters they need from one source, thus being cost-efficient.

FTB-Filtrertechnik Brockmann is one of Europe's leading manufacturers and suppliers of replacement filters for a great variety of applications. We offer top-quality solutions for all areas of filtration. In order to meet all the different filtration needs of our customers, our goal is to offer the perfect filter specifically designed for all kinds of sizes, technical specifications and applications.

Focussing on our core areas of expertise makes FTB a reliable partner for your business, helping you to increase your productivity. Purchasing our filter systems enables you to buy at favourable prices, cut down on storage costs and administrative expenses, save time and money, and optimize your technical processes.

Make FTB your partner in filter systems and purchase all the filters you need from one source.

Feel free to contact us now. Our team will find the right solution for you!

QUALITY DOWN TO THE SMALLEST DETAIL

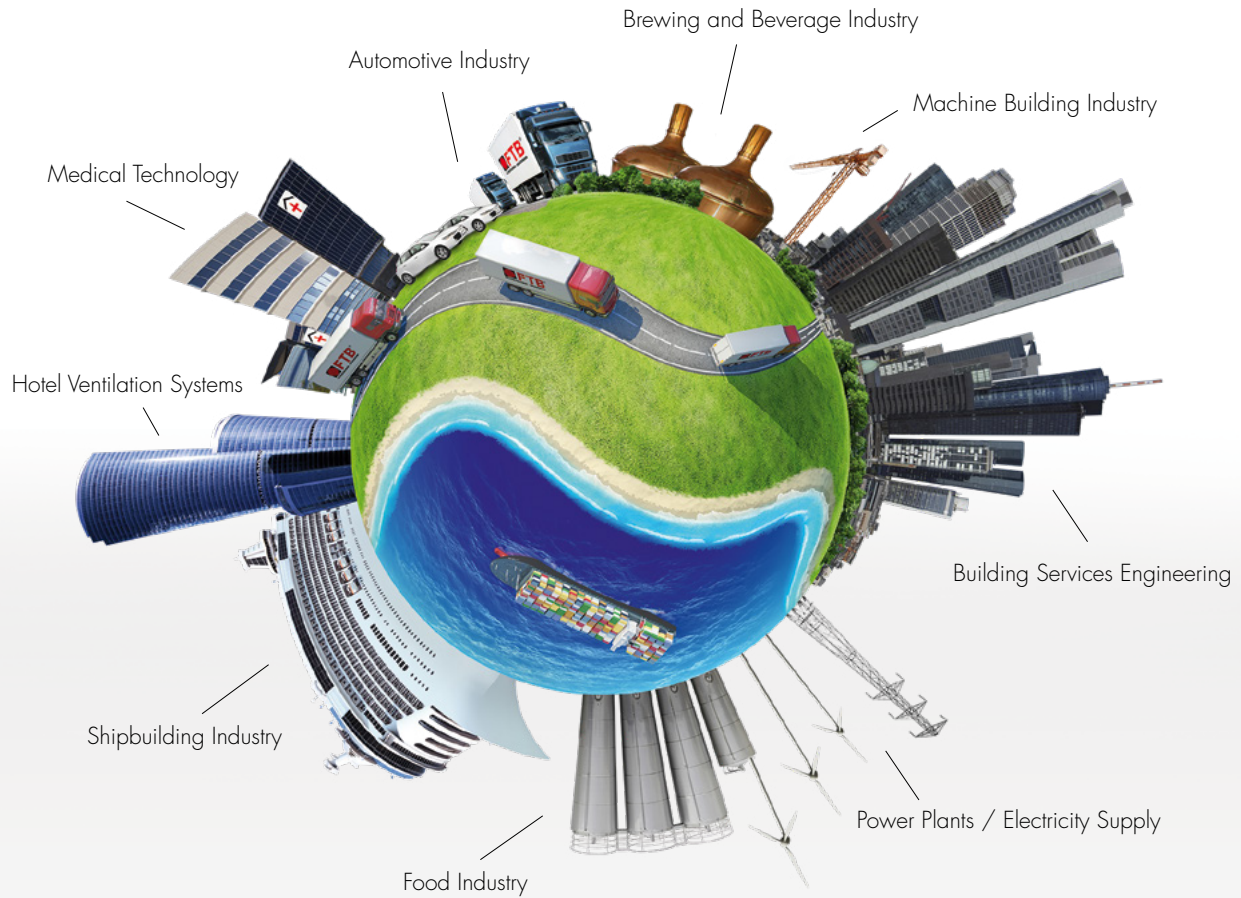

HVAC systems
dust separation
hydraulics process filters
compressed air/condensation technology
residential ventilation

FTB-THE WHOLE WORLD OF FILTERS

THE PERFECT SOLUTION FOR EACH AND ALL OF YOUR APPLICATIONS

Today, air quality protection and environmental compliance become more and more important.

Innovative filter systems help to improve our quality of life, increase the efficiency of tools and machinery, and protect your products and the environment.

FTB-TRADE SHOWS

FTB-Filtertechnik Brockmann exhibits at important trade shows of the industry.

Participating in those trade shows gives us the opportunity to meet long-term business partners and establish new business relationships (at home and abroad).

We present our entire range of products and applications. Come and visit us at one of the trade shows named above. Our team will be more than happy to welcome you!

FILTECH

YOUR PARTNER IN FILTER SYSTEMS

REPLACEMENT FILTERS FOR VIRTUALLY EVERY APPLICATION

HVAC Systems

- filter pads
- pocket filters
- panel filters
- cleanroom filters
- rigid compact filters

available for all
standard systems

Dust Separation

- filter cartridges
- filter tubes
- filter bags
- filter pads

available for all
standard systems

Compressed Air Technology

- compressed air filters & elements
- parts for compressor maintenance
- BEKO condensate treatment systems
- spare parts for condensate treatment systems

available for all standard
models

Hydraulics

- filter elements
- complete filters
- spare parts

available for all
standard models

Process Filters

- filter candles
- filter bags
- filter cloth
- belt filter media

available for all
standard systems

Various Types

- filters used in printing
- filter panels
- stamped parts
- ready-made filter media

COMPLETE

COST-EFFECTIVE

HIGH QUALITY

Consolidation thanks to efficient & effective solutions

Reducing storage costs

Saving time and money

Reducing the number of suppliers

Optimizing technical processes

FTB-LIST OF OUR PRODUCTS

POCKET FILTERS

- Filter media: synthetic fibres
- Standard and customer-specific sizes
- Metal/plastic frames
- Filter grades G4 to F9
- Individual high-quality frame design

Applications:

- HVAC systems
- Pre filters for:
 - spray paint industry
 - cleanroom applications

PANEL FILTERS & Z-LINE FILTERS

- Filter media: synthetic/glass fibres
- Standard and customer-specific sizes
- Filter grades G2 to F7
- Cardboard/metal/plastic frames

Applications:

- HVAC systems
- Pre filters
- Control cabinets
- Suction area in compressors

COMPACT & PANEL FILTERS

- Filter media: synthetic/glass fibres
- Mini-pleat filter design
- Large filter area – but minimal installation depth
- Suitable for high volume flow rates
- Filter grades M5 to H13
- Cardboard/plastic frames

Applications:

- HVAC systems
- Pre filters in cleanroom applications
- Gas turbines

FILTERS REMOVING SUSPENDED PARTICLES/HEPA FILTERS

- Filter media: micro glass fibre paper
- Standard and customer-specific sizes
- Filter grades E10 to U15
- MDF/plastic/metal frames
- Mini-pleat filter design/aluminium separators

Applications:

- Cleanroom systems
- Laboratories/hospitals/pharmaceutical industry
- Food industry
- Microelectronics

FILTER PADS

- Filter media: synthetic/glass fibres
- Available in roll or cut pad form
- Filter grades G2 to F7

Applications:

- Primary/secondary filters for HVAC systems
- Control cabinets
- Motor protection systems
- Intake filters used in surface engineering

FILTERS FOR SPRAY PAINT SYSTEMS

- Filter media: synthetic/glass fibres
- Pleated cardboard filters and Columbus filters
- Paint-stop filters, green and white

Applications:

- Intake and outlet filters used in:
 - Spray booths
 - Spray paint systems
 - Drying systems
 - Ceiling filters

READY-MADE FILTER MEDIA

- Stamped parts/cut pads
- Filter tubes, filter bags
- Filter caps
- Special filters made according to customer specifications

Applications:

- Bathroom ventilation
- Motor protection filters
- Air recirculation systems
- Extraction systems
- Printing industry

HYDRAULIC FILTERS

- Replacement filter elements for all standard models (e. g. Mahle, Hydac, Pall, Argo)
- Pressure filters and return line filters
- Spin-on filters
- Suction strainers
- Air filters

Applications:

- Filtration in oil, cooling and lubrication circuits

PROCESS FILTERS

- Replacement filter elements for all standard models
- Filter candles, bag filters
- Filter modules (disk)
- Filters for sterile filtration
- Complete filter housings (strainers)

Applications:

- Coarse filtration, microfiltration and filtration of process fluids

DUST SEPARATION

- Filter cartridges
- Filter tubes
- Filter bags
- Filter pads
- Accessories (supporting cages, venturi nozzles)

Applications:

- Industrial dust separation
- Silos
- Sandblasting equipment
- Powder coating
- Welding fume extraction

COMPRESSED AIR/ COMPRESSOR FILTERS

- Replacement filters and servicing kits for all standard compressors & vacuum pumps
- Oil separators/air and oil filters
- Air intake filters (filter pads, filter panels)
- Compressed air filter elements available for all manufacturers

BEKO condensate treatment:

- Oil/water separators
- Condensate drains
- Wearing parts kits
- Compressed air filter elements
- Activated carbon filters/Öwamat

RESIDENTIAL VENTILATION

- Servicing kits available for all standard models:
 - Pluggit
 - Exhausto
 - Helios
 - Limot
 - Westaflex
 - Dantherm

Contact us for additional types of filters

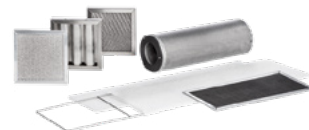

BELT FILTERS MEDIA

- Filter media: polyester, viscose, polypropylene and blended fabrics
- Suitable for all standard systems
- Available in various widths and lengths

Applications:

- Industrial fluid filtration
- Filtration of coolants and lubricants
- Filtration of process fluids
- Belt filter systems

OTHER PRODUCTS

- Activated carbon cartridges
- FanCoil (wire frames)
- Wire mesh filters (aluminium/stainless steel)
- Baffle filters/flame resistant filters

FTB-IN-HOUSE MANUFACTURING

By buying an FTB-Filtertechnik Brockmann product you will receive:
100% QUALITY AND SATISFACTION

It is part of our mission at FTB to manufacture, process and finish our own filters using high-quality materials. We target top quality, reliability, quick order processing, and on-time delivery.

FTB-Filtertechnik Brockmann is able to offer an individual solution that meets all your filtration needs. Our team of experts will be pleased to give you professional advice.
