

GESSNER® Industrial Filtration

Air & Liquid Filter Media

For Gas Turbine, Dedusting, Vacuum Cleaner, Welding Fumes, EDM & Hydraulic

Benefits of Air Filtration

- Broad range of product composites available
- Efficient filtration
- low pressure drop
- tailor-made solutions
- Consistently high quality
- Production lines equipped with online failure detection systems and online permeability/grammage testing systems
- best-equipped testing laboratories
- Testing from intermediate to the final composition
- OEM quality

Benefits of Liquid Filtration

- Consistently high quality
- OEM quality
- Long-term experience
- Wide range of β -values available
- High dirt holding capacity
- Complete product offering for EDM (2 μ m - 25 μ m)
- tailor-made solutions

Neenah Filtration offers a wide range of Industrial filter media. Combining efficient filtration with a low pressure drop at a competitive price. By utilizing the ability to combine production processes, raw materials, and coating technologies We specialize our products to meet individual customer needs. The state-of-the-art machine park today produces filter media that meet the highest demands. Tested in the best-equipped testing laboratories, tested from the intermediate product to the finished end product, the quality is consistently high.

Our wetlaid product range from 100% cellulose, synthetic, or glass fibers, to a wide range of these fibers blended together as needed. Additionally, we offer a wide range of functionalized resin systems or Drylaid (fully synthetic) materials with fibers ranging from 0,25 μ m to 50 μ m- which can be incorporated on- or offline using various bonding technologies. Products become extremely versatile, fit for most Industrial applications. This along with almost 60 years of filtration experience leads to superior products and performance.

Air Filtration Applications

Neenah Filtration is offering a wide selection of filter media for air filtration to improve workplace safety, the productivity and/or to increase environmental protection with sustainability

- Dedusting Filtration / APC for pulse and static use
- Gas Turbine Air Intake
- Industrial Vacuum Cleaners
- Household Vacuum Cleaners
- Welding Fumes

Liquid Filtration Applications

Neenah Filtration provides filter media for industrial liquid applications to enhance industrial processes and to protect machineries and equipment

- Process Fluids
- EDM
- Hydraulic
- Oils
- Water
- Inks, Paints
