

Projet Cleaning-in-Place Filter

Intensiv Filter Himenviro is introducing the new generation of a seamless, space-saving CIP filter for your operation with filter lengths up to 8 m!

This new design ensures a reduced maintenance interval, lower compressed air consumption, and fewer installation parts. The clean gas chamber is made of stainless steel and can be easily washed.

This filter including the ProTex® CIP filter Media – will give an excellent cleaning with a short drying time and a perfect washing. With this filter, you can forget about clogged lines, which saves you time and money.
