Rotafalt Vario

with hotmelt system
500 pleats/min

Since 1991 – We equip customers worldwide with our well-known filter production systems:

- Mini Pleat Lines «Rotafalt vario»
for glasfiber and synthetic completed with hotmelt system
- «Kombi line»
(«Rotafalt vario» combined with blade pleating machine)
- «Rotafalt fix» with and without dimple embossings
- Production line for deep pleat packs with aluminium spacer
- Production line for high temperature pleat packs
(blade pleating machine with ribbon distancing)
- Production line for prefilters
(blade pleating machine with a headline gluing system)

High-speed CNC Mini Pleaters

P7

HIGH-SPEED Pleater
400 pleats/min

Since 1996 – JCEM stands for highest technology, precision machinery, innovative CNC pleating solutions. Swiss Made.

We have developed our 7th Pleater Generation P7 and reached 400 pleats/min running 24h/7days, process approved.

Our customers enjoy multiple benefits from our high quality machinery and peripherals, like unwinders, slitters, cutters and minipleat systems. From single pleaters to complete production lines. Blade pleater widths from 500–3000 mm have been successfully build. Pleat heights from 3–300 mm realized.
