

NORDSON - Next level Precision Dispensing Solutions aiming for Excellence in Filter Application

Nordson advanced technology incorporates ultra-precise dispensing accuracy. The combination of our **extensive product portfolio** and **expert teams** continuously offers customers **best value proposition at best total cost of ownership**.

The **New TruFlow™ Flex** controllers enable flow monitoring and closed-loop control for the installed base of material delivery systems when used with a Nordson TruFlow meter.

When operated in control mode, the TruFlow Flex controllers measure actual material delivery compared to the requirement and continuously adjust pumps in real-time; thus vastly improving material delivery accuracy.

TruFlow™ Flex Controllers:

- Accurately monitor or control up to two flow channels in real-time;
- Intuitive touch-screen interface simplifies set-up and operation;
- Data logging and graphing improve operational control;
- Easily integrates with existing system.
